

CHAIBASA ENGINEERING COLLEGE

An inspirational words from the GATE 2020 aspirants

KUMAR ABHISHEK COMPUTER SCIENCE & ENGINEERING

The benefits of GATE for future career motivated me to start my preparation for it. During the initial days I used to prepare from the YouTube videos. But later I got the opportunity to learn from GATEFORUM through my college. I would like to thanks the GATEFORUM team who helped me a lot during my preparation. The teachers cleared my doubts and problems very well. Their study materials and test series were really very helpful. I sincerely thank my HOD sir and other faculties who supported me a lot. Their advises during the course of preparation was of immense importance

The benefits of GATE for future career motivated me to start my preparation for it during my early college days. My journey for GATE 2020 started back in 2018 towards the end of my 2nd year. In that time, I am grateful to our college faculties and some seniors who motivated me for GATE preparation. During those days, I did self study and for doubt clearance i used to YouTube videos. In last year I got the opportunity to learn from GATEFORUM team through my college. I had developed good problem solving skills during the classes of GATEFORUM team. Their study materials and test series helped me a lot during my preparation. So I am really thankful to GATE Forum and College faculty

CHAIBASA ENGINEERING COLLEGE

An inspirational words from the GATE 2020 aspirants

KAJU SHARMA MECHANICAL ENGINEERING

I have appeared GATE 2020 in Mechanical engineering paper and secured GATE score of 554. I would like to thank our college, GATE forum institute and faculty, our college teacher, GATE coordinator and all those who supported me during preparation for GATE exam. I started preparation after my 6th sem university examination. I attend almost all class conducted by GATE forum. I solved previous year GATE question for getting idea about examination pattern of GATE and focused on important subject for Mechanical engg. I have attended test series on that, which are provided by GATE forum. I have gone through other source like NPTEL, our class teachers also.

My GATE score is 363. I am sharing my preparation strategy as I am qualifying the GATE examination in 1st attempt so that it can help you just from the beginning how to manage your pace and consistency to get qualified but with good marks. Dear friends maintain a good routine , always think about your time management, go through the exam pattern and previous year question bank with punctuality and consistency. One more thing is that, have one test series to evaluate yourself which helps you a lot. At last I want to thank my parents, all the faculty members of my college, and GATE FORUM because they are the real motivator for me to get any success beside my carrier.

ASHUTOSH KUMAR ROY CIVIL ENGINEERING

CHAIBASA ENGINEERING COLLEGE

AN INSPIRATIONAL WORDS FROM THE GATE 2020 ASPIRANTS

**MADHUMITA
KUMARI**
COMPUTER SCIENCE &
ENGINEERING

First I started studying myself and took help from geeks for geeks. Then our college organised GATE classes for us which was really helpful. Teachers kept motivating us. They also let us know the strategies and tactics to perform well. Though I haven't scored very good but I learnt a lot of things.

Wish you all the best for your future!
